Tools & Automation:	Jira, Confluence, Postman (Assertion Suites), SQL/JPQL, Swagger, n8n Workflow Automation, Grafana Monitoring, Custom LLM/GPT Assistants, Draw.io.

PROFESSIONAL EXPERIENCE

ANR SOFTWARE PVT. LTD.	Noida, India Apr 2022 – Present
Techno-Functional Business Analyst & Integration Lead	
- Orchestrate POS, EDI, and inventory data pipelines across an enterprise network of 10,000+ active store locations for Tier-1 QSR clients (Inspire Brands, Chicken Salad Chick, Steak 'n Shake, Golden Chick, Rubio's, TMAD). - Directed pull-based API integration and store onboarding for 2,500+ new QUPOS stores, designing rate-controlled ingestion queues to prevent server choke. - Spearheaded end-to-end migration of 10+ core enterprise applications to MinIO S3 object storage, achieving an official 50% reduction in primary database disk load with 100% data integrity. - Engineered automated off-peak data-fetching workflows using n8n, reducing API throttling and syncing store data during low-traffic windows. - Led Hibernate upgrade across 15 applications with 0 post-release bugs and executed seamless AWS server migrations, awarded 2x Employee of the Month and 2x Corporate Newsletter Appreciation. - Developed internal Custom GPT and AI assistants to streamline sprint requirement lookup and team onboarding.	
CHARTERED ACCOUNTANCY FIRM	Patna, India 3 Years Full-Time
Chartered Assistant (Financial Audit & Systems)	
- Executed statutory, internal, and tax audits for corporate clients, testing ledger controls, transaction flows, and financial compliance frameworks including Punjab National Bank. - Formulated analytical financial models and reconciliation matrices that serve as the foundation for enterprise ERP and payment mapping.	

FEATURED ENTERPRISE PROJECTS

Multi-Brand POS Integration Engine (10,000+ Stores)	Production Live
Designed standardized JSON schema adapters and pull poller architectures connecting PAR Brink, Aloha, NCR Silver, and Toast into central reporting systems for Cash & Sales, Menu Mix, Ideal Hours, and Timekeeping.	
Supply Chain EDI Automated Ingestion (GFS, PFS, GFS US)	Production Live
Engineered multi-vendor SFTP automated ingestion pipelines processing EDI 850, 810, and 832 files, eliminating manual invoice entry and enabling daily real-time store margin and food cost analytics.
