

RAJEEV KUMAR OJHA

Senior Techno-Functional Business Analyst & Integration Lead

Delhi NCR, India +91 8864012753 rajeevjee.ojha1@gmail.com [linkedin.com/in/rajeev-kumar-ojha](https://www.linkedin.com/in/rajeev-kumar-ojha) github.com/R-Ojha

PROFESSIONAL SUMMARY

Results-driven **Techno-Functional Business Analyst & Integration Lead** with **4.5+ years** in IT enterprise software delivery (QA/BA) and **3 years CA Articleship**. Proven track record managing mission-critical POS, EDI, and inventory data pipelines across **10,000+ active stores** for Tier-1 brands (**Jack in the Box, Inspire Brands, Denny's, Bojangles, Steak 'n Shake**). Led microservices integration of **2,500+ stores**, delivered a **50% SQL DB load reduction via MinIO**, and automated off-peak historical data pipelines with zero data loss. Dual-threat leader combining deep financial reconciliation rigor (**CA Intermediate**) with hands-on systems architecture (SQL, REST/SOAP APIs, Webhooks, n8n).

TECHNICAL & PROFESSIONAL COMPETENCIES

BA & Product Leadership:	Requirement Elicitation, BRD/FRD/SRS Authoring, User Stories & Acceptance Criteria (Gherkin/INVEST), BPMN As-Is/To-Be Flows, Schema Split Design, JAD Workshops, UAT Sign-off, Backlog Grooming.
POS & Integration Protocols:	QUPOS (Pull/Cron), PAR BRINK (SOAP/XML), NCR SILVER (REST/Swagger), Aloha POS (On-Premise EXE / .DBF Reader), XENIAL, LUCAS, Webhook Ingestion/Transport, EDI (850, 810, 832, 997 ACK via SFTP).
Data Engineering & DB:	SQL / JPQL Querying, PostgreSQL TOAST/BLOB Decoupling, MinIO S3 Distributed Storage, Receiver-Connector Normalization, Day-Level Rollups, Tri-Tier Alert Telemetry (Fetch/Process/Transport).
Tools & Automation:	Jira, Confluence, Postman (Assertion Suites), n8n Workflow Automation, Grafana, AWS (EC2/S3), Swagger, Git/GitHub, Custom AI / GPT Agent Integration.

PROFESSIONAL EXPERIENCE

Techno-Functional Business Analyst & Integration Lead ANR Software Pvt. Ltd.	Apr 2022 – Present Delhi NCR, India
Enterprise Scale & Operations: Orchestrate POS, EDI, and inventory data pipelines across 10,000+ active store locations, maintaining 99.99% data availability and zero-loss financial integrity. Unified Pull Engine & Consolidation (2,500+ Stores): Spearheaded pull-based 2-consumer microservices integration for QUPOS (Jack in the Box - 2,000+ stores), and executed zero-downtime cutover consolidating XENIAL (Denny's - 300 stores) and LUCAS (Bojangles - 200 stores). Designed check-level staging (Receiver DB), child normalization (Connector DB), and day-level parent rollups with tri-tier alerting (Fetch/Process/Transport). Multi-Protocol POS & SME Webhooks: Act as team SME for PAR BRINK SOAP/XML (Inspire Brands 1.2k, Mooyah 300), NCR SILVER REST (Steak 'n Shake 300), and Aloha Desktop EXE/.DBF binary readers (Mellow Mushroom 100). Architected outbound JSON Webhooks and real-time BI feeds across multiple SME clients. MinIO Storage Offloading (15+ Apps): Led end-to-end offloading of heavy BLOB/TOAST tables to MinIO S3 object storage across 15+ core applications with a 3-layer fallback architecture (Primary + Live Replica + DB Flag), achieving a 50% SQL disk reduction and slashing backup windows from 4 hours to 20 minutes (Awarded Employee of the Month). Supply Chain EDI Engine: Architected automated SFTP ingestion for GFS, PFS, and GFS US, parsing EDI 850/810/832 files into internal schemas and generating bidirectional EDI 997 Functional Acknowledgments. n8n Intelligent Rate-Limiting: Built an automated off-peak pipeline in n8n with GSheet feed and JavaScript rate-limiting (6 stores / 10 mins & 60s store cooldown), backfilling 13 months of historical data for LUCAS with zero 429 errors. Platform Upgrades & Migrations: Led an end-to-end Hibernate migration across 15 applications with zero post-release bugs and managed AWS server transitions (Awarded 2x Employee of the Month and 2x Corporate Recognitions).	
Articled Assistant (Financial Audit & Systems) Chartered Accountancy Firm	3 Years Full-Time Patna, India
- Conducted statutory, internal, and tax audits for corporate clients including Punjab National Bank, executing ledger analysis, internal controls assessment, and financial compliance verification. - Established financial reconciliation models that form the foundation for 3-way ERP data matching and ledger balance verification.
